Market commentary

Vanguard LifeStrategy® 100% Equity Fund

As at 30 June 2025

Highlights

1

UK employment weakened.

2

The European Central Bank cut its interest rate as inflation fell.

3

Tariffs weighed on US growth.

In Q2 2025, trade and policy uncertainty dominated headlines. Trade distortions caused economic activity to soften in the US but improve in the euro area and the UK. While inflation fell below target in the euro area and was benign in the US, it remained elevated in the UK. During the quarter, the European Central Bank (ECB) and the Bank of England (BoE) cut their key lending rates, while the US Federal Reserve (Fed) kept rates unchanged.

In the UK, growth expanded by 0.7% (quarter-on-quarter) in Q1, while Q2 survey data suggested the uptick was due to one-off effects. Employment showed signs of cooling, with the unemployment rate edging up. Annual headline inflation rose to 3.4% in May, up from March's 2.6%. Despite this, the BoE cut interest rates from 4.50% to 4.25% in May on economic growth concerns.

Euro area economic activity expanded by 0.6% (quarter-on-quarter) in Q1. As in the UK, the growth uptick was due to one-off trade distortions, as recent survey data pointed to a

return to more modest growth in Q2. With headline inflation falling to 1.9% in March, below the ECB's 2% target, the ECB cut its policy rate twice to 2.0% from 2.5%.

Lastly, the US economy contracted by 0.2% (quarter-on-quarter, annualised) in Q1. Elevated policy uncertainty, trade tensions and the front-loading of imports all weighed on economic activity. Survey indicators suggested a marginal rebound in Q2. Tariffs have yet to materially impact inflation, with the Fed's preferred inflation measure, the annual Core Personal Consumption Expenditures (PCE) Index, edging down from 2.7% in March to 2.5% in May. Similarly, headline PCE fell from 2.3% to 2.1% over the same period. With the economic outlook clouded by uncertainty, the Fed opted to keep interest rates unchanged, leaving the federal funds target range at 4.25-4.50% at the end of Q2.

Fund commentary

Vanguard LifeStrategy® 100% Equity Fund

As at 30 June 2025

Highlights

- | | | |
|--|--|--|
| 1
The LifeStrategy 100% Equity Fund recorded a 4.82% return. | 2
All major regional equity markets delivered healthy returns. | 3
US equities rebounded from a steep, tariff-led sell-off. |
|--|--|--|

The LifeStrategy 100% Equity Fund recorded a return of 4.82% in the second quarter of 2025.

The Fund's performance was driven by its exposure to US, UK and developed world (ex-UK) equities. Holdings in developed Europe (ex-UK) and emerging markets also made notable contributions.

US equities rebounded strongly in Q2 (in US dollar terms), recovering from a steep sell-off early in the quarter sparked by the announcement of new trade tariffs. US market confidence was buoyed by resilient economic data (especially on inflation), easing trade tensions and a robust corporate earnings season. "Magnificent Seven" technology stocks led the rally, particularly Nvidia. The US "One Big Beautiful Bill Act" tax and spending bill moved a step closer to being signed into law during Q2. Bond market concerns about the US's increasing debt burden were realised when the credit ratings agency Moody's downgraded the US sovereign credit rating. UK equities rose on improved sentiment following better-than-expected Q1 2025 economic

growth figures, new trade deals with the US, India and Europe and a cut in the Bank of England's base rate. Euro area equity markets delivered notable gains, supported by two interest rate cuts, continued positive momentum from plans to significantly boost defence spending and the postponement of US tariffs on EU goods. The softer US dollar provided broad support for emerging market equities. Korea and Taiwan, in particular, delivered strong returns after the delay in trade tariffs boosted investor sentiment in their technology sectors. The Japanese stock market rose on continued corporate governance reforms and progress in trade talk negotiations with key partners.

Fund factsheet

Vanguard LifeStrategy® 100% Equity Fund

As at 30 June 2025

Total fund assets: £9,235mn

Investment objective and policy summary

- The Fund seeks to hold investments that will pay out money and increase in value through a portfolio comprising approximately 100% shares.
- The Fund will have exposure to shares of UK companies and non-UK companies (including emerging markets (i.e. countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body)). The UK will generally form one of the largest single country exposures for shares.

¹Synthetic Risk and Reward Indicator is used to indicate the level of risk of a UCITS fund on a scale of 1 to 7, with 1 representing low risk and 7 representing high risk.

²The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds. When you invest with any fund manager, you pay a number of charges, starting with the Annual Management Charge (AMC) which covers the fund manager's costs of managing the fund. The AMC plus ongoing running costs and other operational expenses make up the fund's total 'ongoing charges figure'.

Key investment risks

The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Past performance is not a reliable indicator of future results.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

The Vanguard LifeStrategy® Funds may invest in Exchange Traded Fund (ETF) shares.

ETF shares can be bought or sold only through a broker. Investing in ETFs entails stockbroker commission and a bid- offer spread which should be considered fully before investing.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>.
