Vanguard low-cost active

Active managers aim to deliver excess returns relative to their benchmarks that outweigh the fund’s charges. We’ve made it easier for this equation to work by pricing our active funds competitively.

We leverage our scale and deep capabilities to identify and access both internal and external investment talent globally that might otherwise be out of reach to the average UK investor – all at low cost and with the added benefit of Vanguard’s robust oversight and due diligence.

Our active range is founded on three core principles:

- An ongoing commitment to driving down costs
- Unique access to a vast talent pool – both internal and external
- Designed for the long term with clients in mind

Vanguard has a deep history of active management, having managed active funds since our beginning in 1975. Today, Vanguard is one of the largest active managers in the world.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Some funds invest in securities which are denominated in different currencies. Movements in currency exchange rates can affect the return of investments.
