- 1 The annual portfolio charge covers the discretionary management of the managed portfolio service, ongoing oversight, and regular rebalancing of the portfolios. The portfolio charge is exclusive of VAT and any adviser, platform, or dealing charges.
- 2 The OCF refers to Ongoing Charges Figures and covers the fund manager's costs of managing the fund. It does not include dealing costs or additional costs such as audit fees
- 3 All-in costs include OCF and the annual portfolio charge.
- 4 Transaction costs: All costs and charges incurred as a result of the acquisition and disposal of underlying investments within the fund. This includes broker commissions, entry and exit charges, spreads, stamp duty, transactions tax, and foreign exchange costs.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Some funds invest in securities which are denominated in different currencies. Movements in currency exchange rates can affect the return of investments.
