

Vanguard®

Vanguard LifeStrategy® Funds

October 2017

Quarterly Newsletter

This quarterly newsletter is designed to give Vanguard LifeStrategy® investors an insight into how the funds are constructed, how they're performing and what's been happening in the global economy and world markets.

The Vanguard LifeStrategy® Funds are single-fund solutions designed to meet a range of investors' needs. Each of the five funds has a different target weighting of equities and bonds, with the aim of delivering a range of risk and return outcomes for investors.

Vanguard regularly rebalances the funds to their target allocations to ensure that they continue to meet investor needs. This means investors can focus on working with their advisers to review their goals and circumstances, confident in the knowledge that the target weightings will stay on track.

Economic background

UK economic performance was sluggish in the third quarter, with the construction sector particularly weak. Since the Brexit vote, sterling has remained weak, leading to a sharp increase in import prices and inflation. Given the rise in inflation, at the most recent Monetary Policy Committee meeting, the Bank of England offered its strongest indication in a decade that it is poised to raise interest rates. Current market expectations suggest that there may be one interest rate hike at the end of 2017.

The euro area performed strongly in the third quarter, with further improvements in business and consumer confidence. The strong performance of the economy is broad based, with the four major economies, Germany, France, Italy and Spain, all growing at an above trend pace. In Germany, national elections saw Angela Merkel elected as Chancellor for the fourth consecutive term. Merkel received a smaller share of the vote than at the previous election, and will now work to form a coalition government with other parties.

In the US, the economy experienced a slightly softer third quarter with the temporary blowback from the two recent hurricanes. Interest rates remained between 1% and 1.25%, however the Federal Reserve announced that it would start to unwind the stimulus, or quantitative easing, that was implemented in the early years after the 2008 financial crisis.

In Japan and China, economic performance has been robust in recent months. There have, however, been tensions in Asia regarding North Korea's nuclear weapons testing over Japanese territory. In response to these tensions, and a bounce in opinion polls, Japanese Prime Minister Shinzo Abe called a snap election which is likely to take place before year-end.

Key takeaway

What should investors do in response to these developments?

Many investors change their portfolios in a bid to take advantage of the latest news. However, it's very difficult to time these changes effectively.

In practice, shifting your portfolio in response to short-term events may lead to little more than increased trading costs.

At Vanguard, we believe that investors will usually be better served by identifying the appropriate asset allocation to suit their goals, then sticking with it and tuning out short-term noise. By regularly rebalancing back to target weights, the LifeStrategy® funds are built to reflect this belief. See the back page for more on Vanguard's principles for investing success.

Market performance

Equity and bond market total returns in Q3 2017

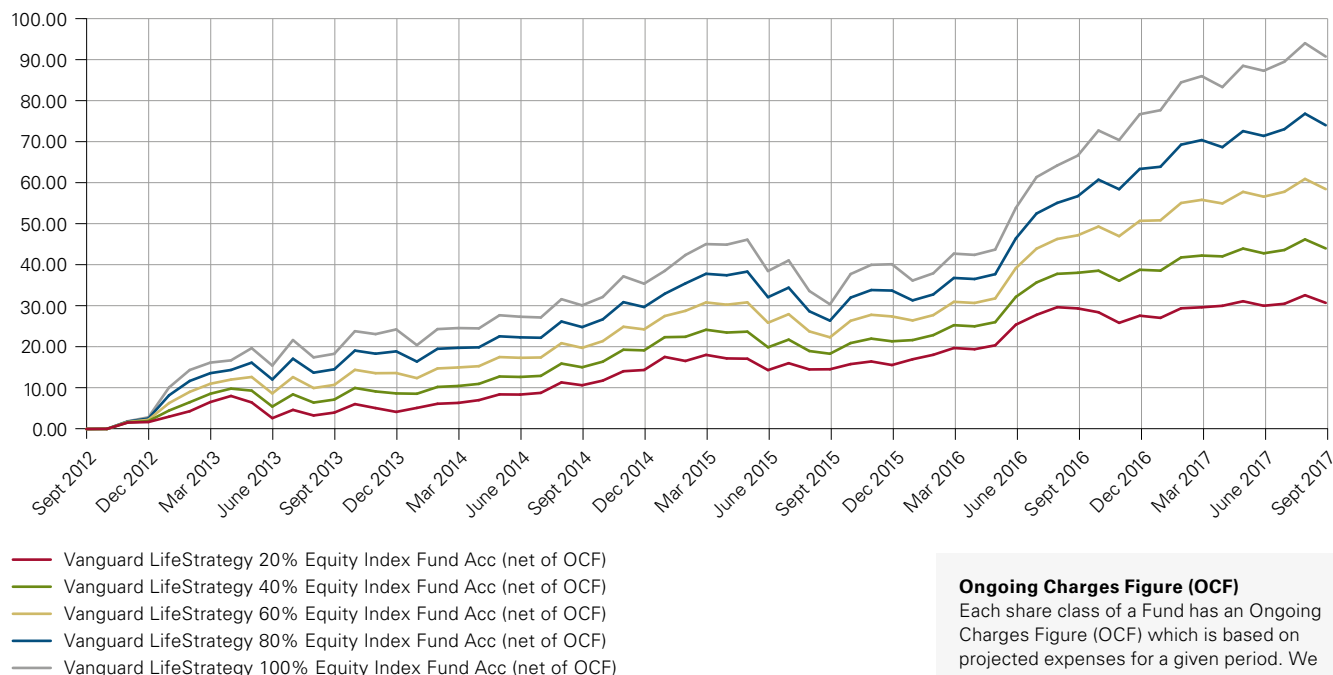

Past performance is not a reliable indicator of future results.

Source: Vanguard as at 30 September 2017. Total returns in GBP. Indices used: FTSE Developed ex-U.K. Index; FTSE All-Share Index; S&P Total Market Index; FTSE Developed Europe ex-U.K. Index; MSCI Emerging Markets Index; MSCI Japan Index; MSCI Pacific ex Japan Index; Bloomberg Barclays Global Aggregate Float Adjusted Index Hedged; Bloomberg Barclays Global Aggregate U.K. Government Float Adjusted Bond Index; Bloomberg Barclays Global Aggregate U.K. Non-Government Float Adjusted Bond Index; Bloomberg Barclays U.K. Government Inflation-Linked Float Adjusted Bond Index; Bloomberg Barclays Global Aggregate U.S. Government Float Adjusted Bond Index Hedged; Bloomberg Barclays Global Aggregate U.S. Credit Float Adjusted Bond Index Hedged; Bloomberg Barclays Global Aggregate Euro Government Float Adjusted Bond Index Hedged; Bloomberg Barclays Global Aggregate Euro Non-Government Float Adjusted Index Hedged; Bloomberg Barclays Global Aggregate Japan Government Float Adjusted Bond Index Hedged.

Fund performance

Cumulative % growth, GBP, 30/09/2012 to 30/09/2017

Performance shown is cumulative and include the reinvestment of all dividends and any capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance NAV to NAV.

Past performance is not a reliable indicator of future results.

Ongoing Charges Figure (OCF)

Each share class of a Fund has an Ongoing Charges Figure (OCF) which is based on projected expenses for a given period. We review these projections regularly to make sure they are appropriate. The OCF covers administration, audit, depositary, legal, registration and regulatory expenses incurred in respect of the Funds. The Funds' Authorised Corporate Director will usually pay those fees out of its periodic annual management charge (AMC), which means that the OCF will normally equal the AMC. There may, however, be certain extraordinary expenses which cause the OCF to exceed the AMC. The OCF does not include portfolio transaction costs incurred by a Fund or the cost of subscribing for, or redeeming, shares or units in a Fund.

Please see individual fund performance tables for further information

Vanguard's principles for investing success

It's easy to be swayed by the latest developments in the markets or the economy, manager ratings or the performance of an individual security or strategy. However, instead of getting caught up in investment "noise", we believe that investors stand a better chance of success if they remain focused on the things they can control. We believe there are four fundamental principles that can help investors stay on track.

Vanguard's LifeStrategy® Funds embody these principles and have been carefully constructed to give investors of all risk appetites the best chance of investment success.

1 Goals

Create clear, appropriate investment goals

An appropriate investment goal should be measurable and attainable.

Success should not depend upon outsized investment returns, nor upon impractical saving or spending requirements.

2 Balance

Develop a suitable asset allocation using broadly diversified funds

A sound investment strategy starts with an asset allocation suitable for the portfolio's objective.

The allocation should be built upon reasonable expectations for risk and returns, and should use diversified investments to avoid exposure to unnecessary risks.

3 Cost

Minimise cost

You can't control the markets, but you can control the bite of costs and taxes. The lower your costs, the greater your share of an investment's return.

In addition, Vanguard research suggests that lower-cost investments have tended to outperform higher-cost alternatives. To hold onto even more of your return, manage for tax efficiency.

4 Discipline

Maintain perspective and long-term discipline

Investing can provoke strong emotions. In the face of market turmoil, some investors may find themselves making impulsive decisions or, conversely, becoming paralysed, unable to implement an investment strategy or to rebalance a portfolio as needed.

Discipline and perspective can help investors remain committed to their long-term plans.

Important information

This document is designed for use by, and is directed only at persons resident in the UK.

Vanguard Asset Management, Limited only gives information on products and services and does not give investment advice based on individual circumstances. If you have any questions related to your investment decision or the suitability or appropriateness for you of the product[s] described in this document, please contact your financial adviser.

The material contained in this document is not to be regarded as an offer to buy or sell or the solicitation of any offer to buy or sell securities in any jurisdiction where such an offer or solicitation is against the law, or to anyone to whom it is unlawful to make such an offer or solicitation, or if the person making the offer or solicitation is not qualified to do so.

The information in this document is general in nature and does not constitute legal, tax, or investment advice. Potential investors are urged to consult their professional advisers on the implications of making an investment in, holding or disposing of units/shares of, and the receipt of distribution from any investment.

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested. Past performance is not a reliable indicator of future results.

Reference in this document to specific securities should not be construed as a recommendation to buy or sell these securities, but is included for the purposes of illustration only.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall.

ETF shares can be bought or sold only through a broker. Investing in ETFs entails stockbroker commission and a bid-offer spread which should be considered fully before investing. The Vanguard LifeStrategy® Funds may invest in Exchange Traded Fund (ETF) shares.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

The funds may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the fund's Net Asset Value. Some derivatives give rise to increased potential for loss where the fund's counterparty defaults in meeting its payment obligations.

The Authorised Corporate Director for Vanguard LifeStrategy® Funds ICVC is Vanguard Investments UK, Limited. Vanguard Asset Management, Limited is a distributor of Vanguard LifeStrategy® Funds ICVC.

For further information on the fund's investment policy, please refer to the Key Investor Information Document ("KIID"). The KIID and the Prospectus for this fund is available from Vanguard via our website <https://global.vanguard.com/>.
